

**The purpose of this project is to establish a safe and efficient route for people to walk and bike between Wolcott Mill Metropark and the Macomb Orchard Trail**

# Multiple routes were evaluated and scored based on the criteria to the right

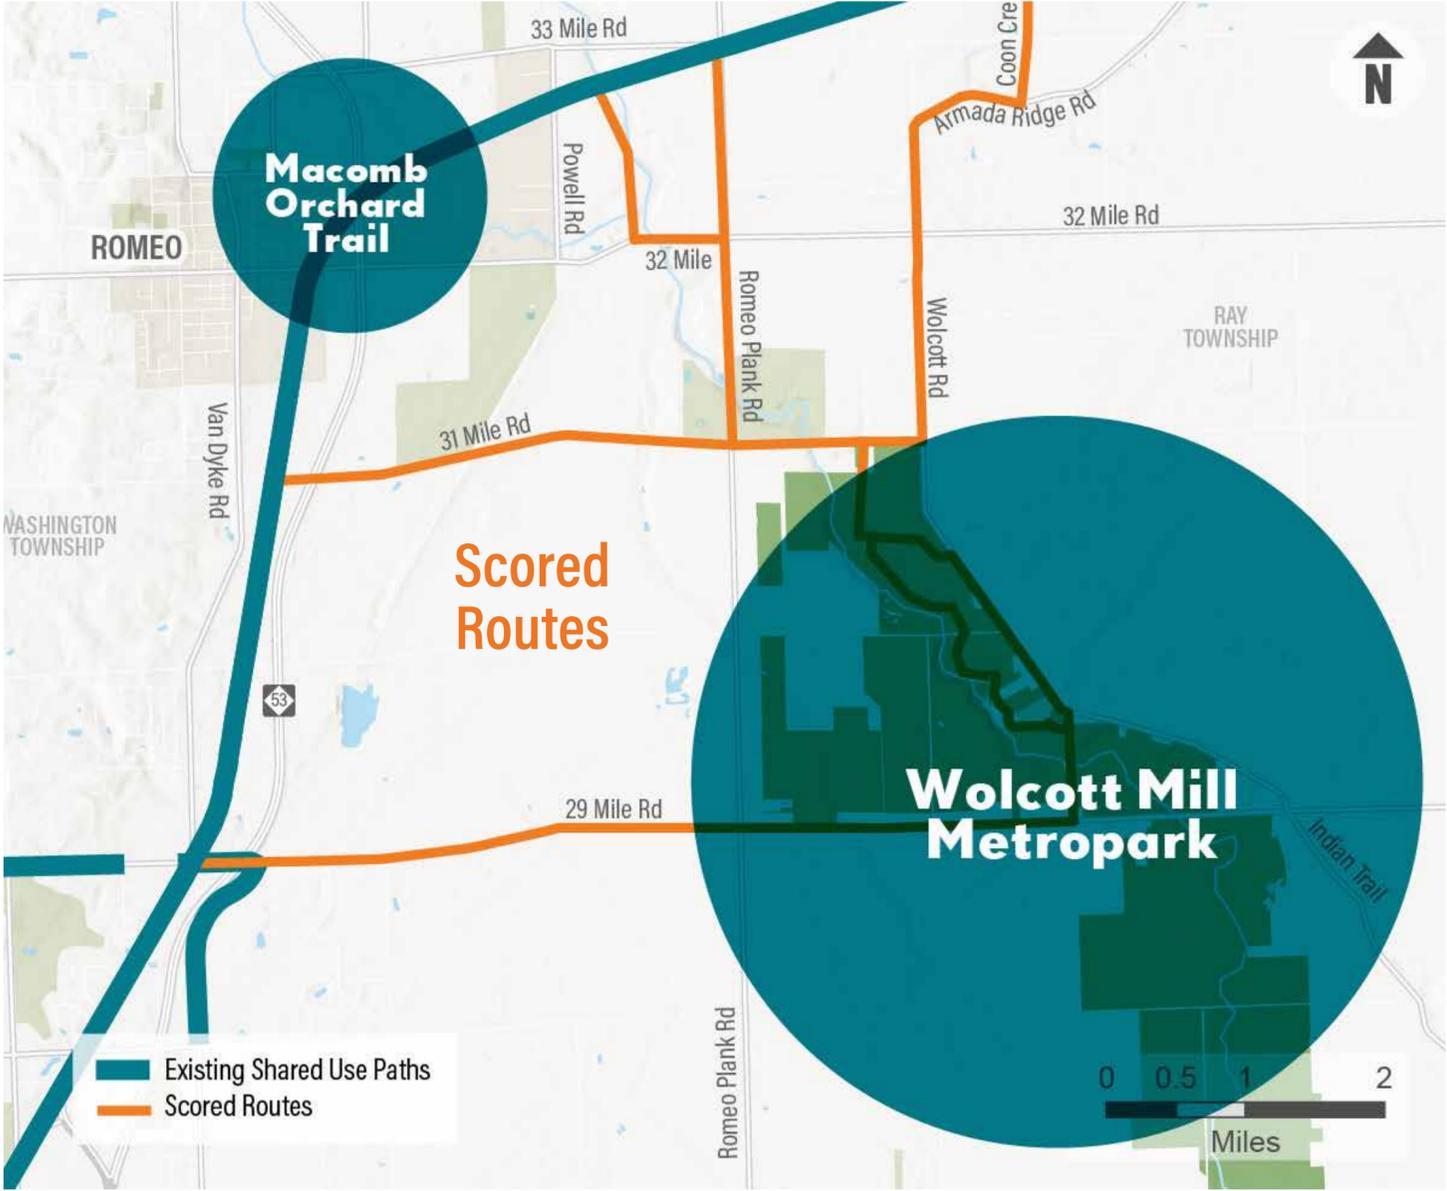

Access to Recreation

Residential Accessibility

Safety

Scenic Quality

Viability of Long-Term Maintenance

Adjacent Amenities

Property Acquisition Feasibility

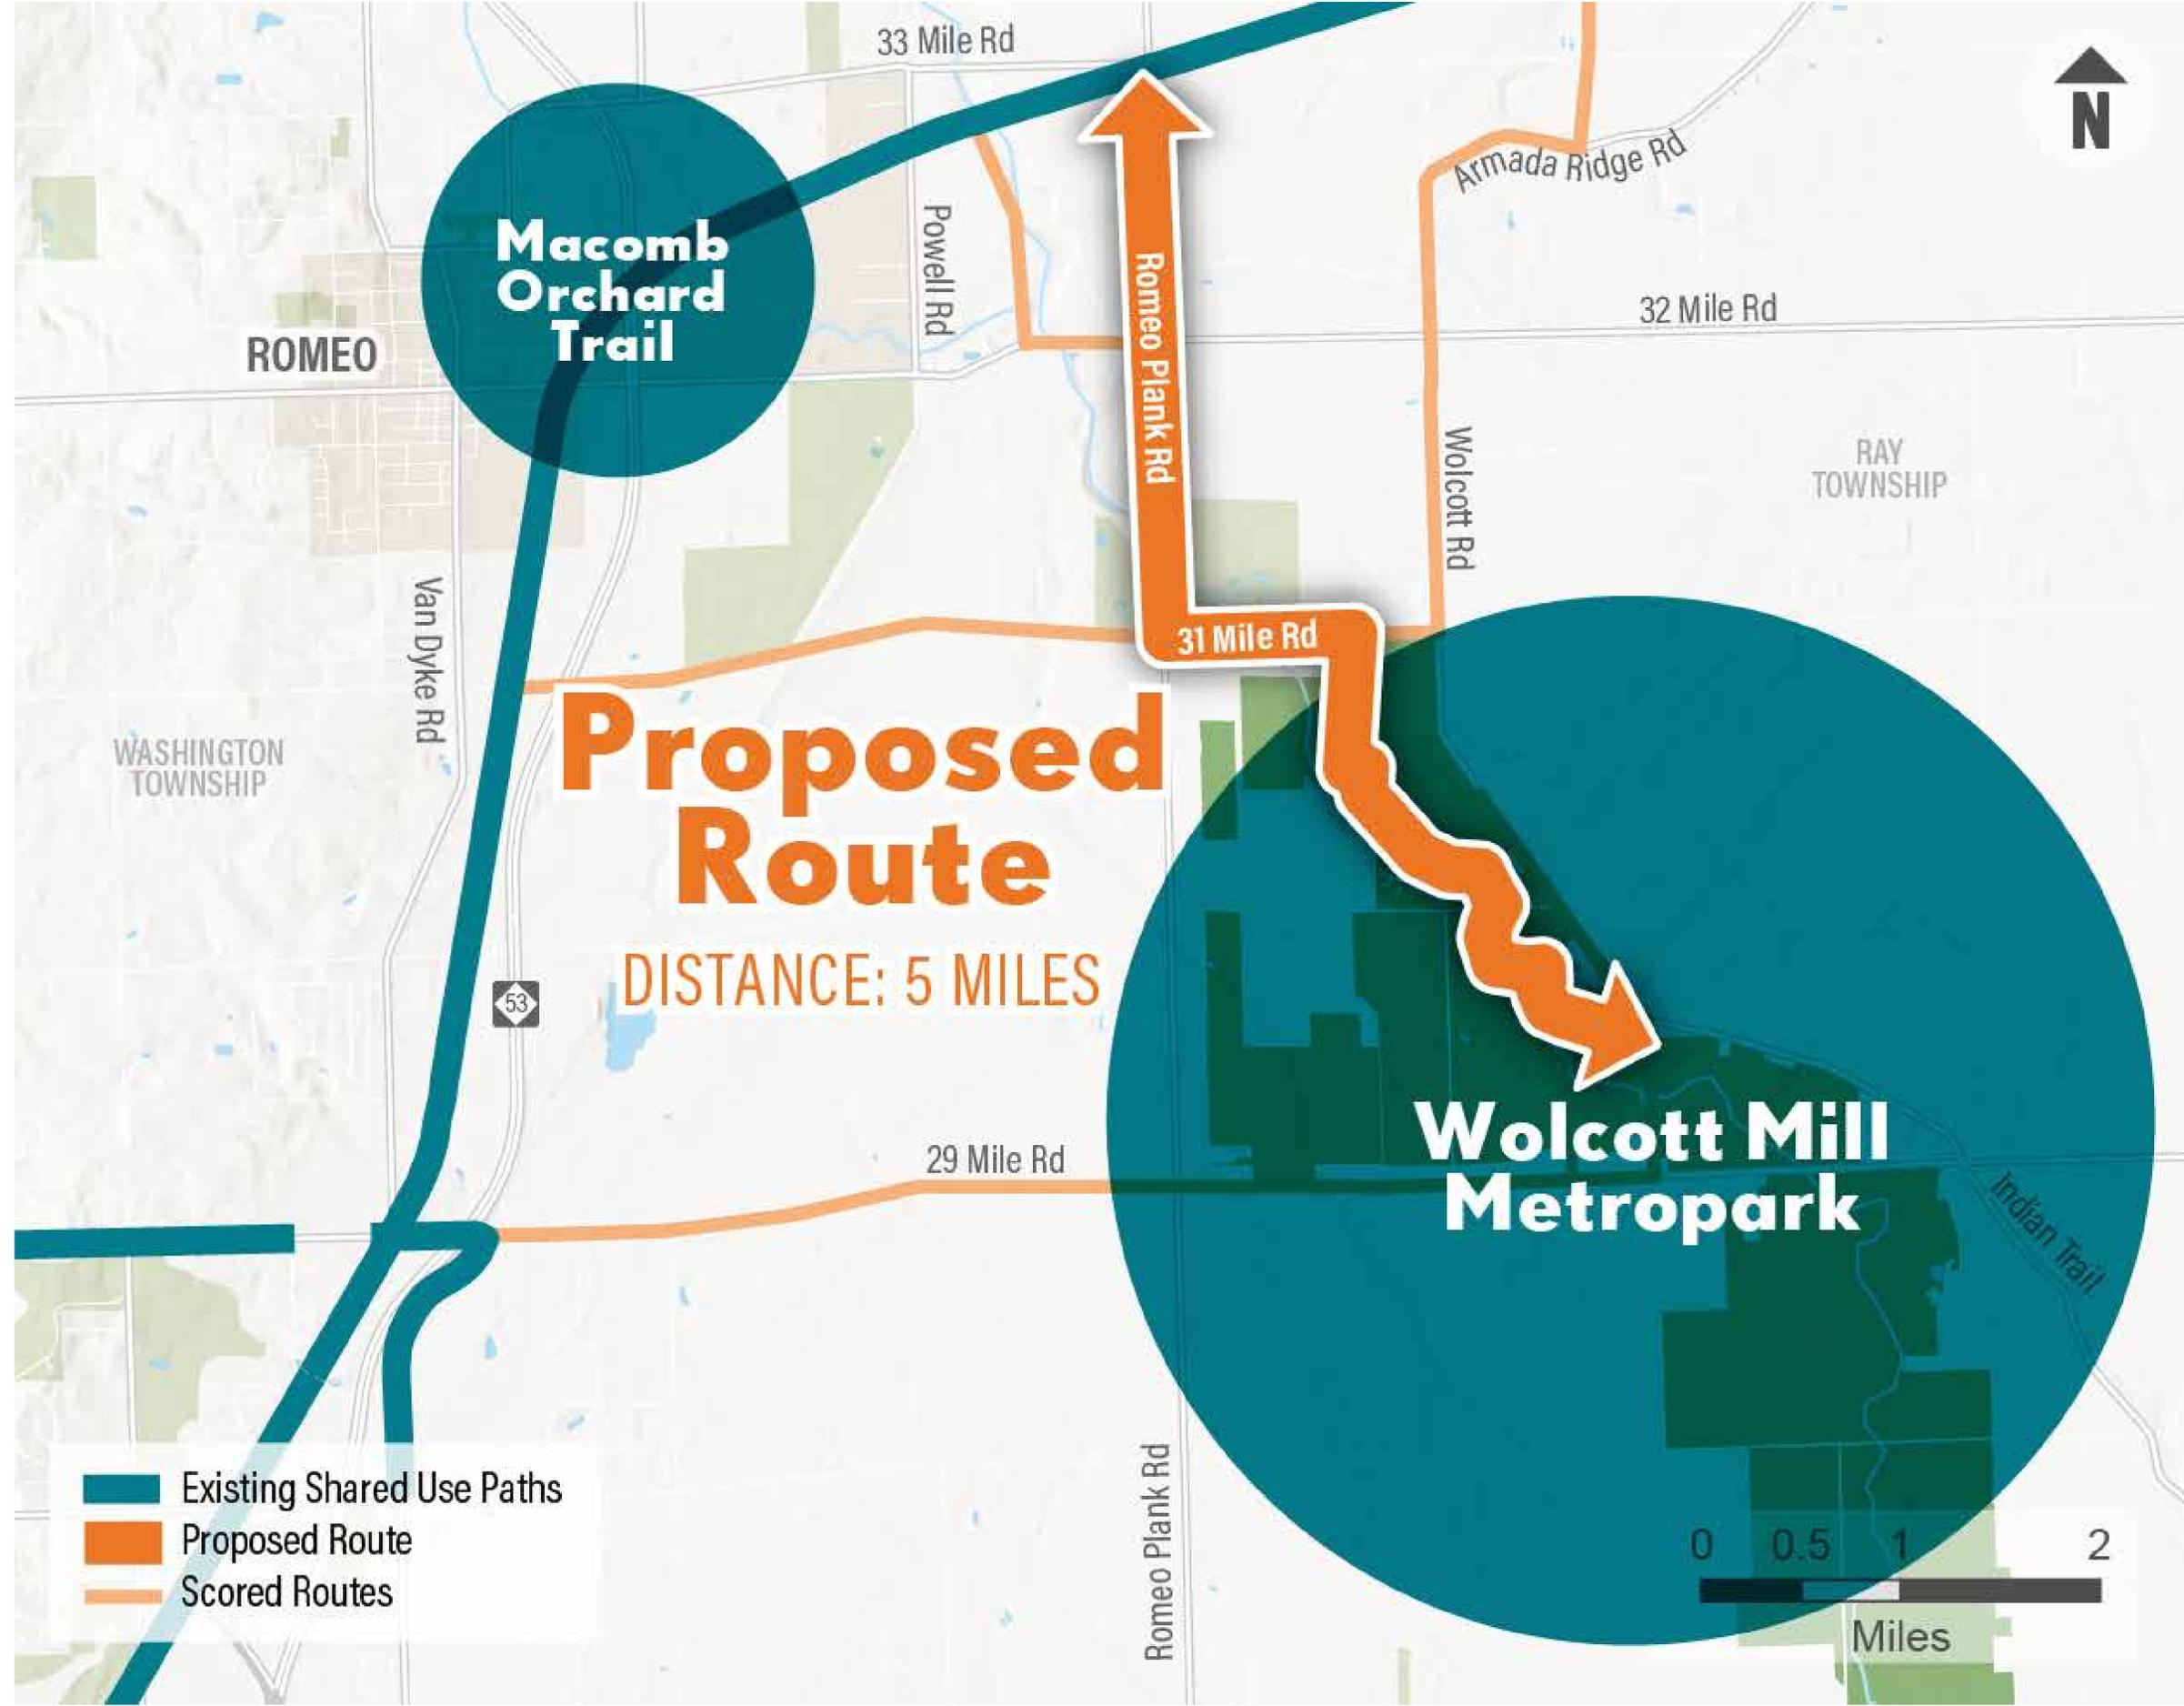

Metropark Connectivity

Feasibility of Development

**The highest scoring route is 5 miles in length and takes about 25 minutes to bike**

**Paved shared use pathways are ideal, but not realistic in all areas**

**Compacted gravel pathways may be more appropriate in rural areas**

**Some areas may be limited to on-road bikeways and sidewalks**

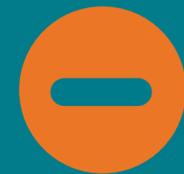

## Key Elements and Challenges of the Proposed Route

The proposed route connects previously inaccessible park amenities by adding a new two mile pathway between the Farm Center and Historical Center in Wolcott Mills Metropark

Limited right-of-way space for a full 10' wide shared use path the entire route, on-road bikeways may offer a more practical connection north of the park

Significant drainage issues (would require deep ditches or storm sewer)

Traverses residential unpaved roads with limited amenities

**We are seeking your input to help us finalize the route that scored the highest**

**Take the survey to tell us what you think**
